### WORKING PAPERS

1. Lewis, Brittany, 2021, [“Creditor Rights, Collateral Reuse, and Credit Supply.”](#) Working Paper  
(previously titled: *The Effect of Dealer Leverage on Mortgage Quality*)
  - Press: [Kelley School of Business News](#)
  - *Journal of Financial Economics R&R*

Dealers’ ability to reuse collateral increases credit supply to mortgage companies and in turn mortgage originations. Using a regulatory change in 2005, just before the Financial Crisis, I document that strengthening creditor rights on mortgage-backed collateral increases dealers’ credit supply by increasing their ability to reuse collateral. Using data on dealers’ credit lines to mortgage companies, I establish that dealers pass their credit supply increase to mortgage companies both by increasing the value of credit lines

and relaxing restrictions on non-conforming mortgages securing the lines. Mortgage companies respond by increasing the volume of mortgages and the fraction of non-conforming originations.

**2. Lewis, Brittany, 2020, “Real Effects of Capping Bank Leverage,” Working Paper**

In this paper, I study the effects of bank leverage ratio restrictions in a general equilibrium model of the macroeconomy where lenders can anticipate bank runs. This framework allows the analysis of the tradeoffs associated with bank capital requirements - while unlimited leverage allows capital to flow most freely to its most efficient users, limiting leverage through capital requirements reduces the probability of a bank run. This model enables me to study the general equilibrium effects of these tradeoffs on household welfare to understand characteristics of the optimal bank leverage ratio requirement. I find that the optimal leverage restriction will be time varying across the business cycle. When the household's marginal utility of consumption is highest, the leverage ratio requirement should be the least restrictive. Conversely, when the household's marginal utility approaches its steady state level, the optimal leverage ratio becomes more restrictive.
